RESEARCH STATEMENT

I am a **statistical scientist** working at the interface of statistical methodological development and applications to **global health** challenges. My primary research interests focus on developing novel geostatistical methods for **disease mapping**, with particular emphasis on infectious diseases and health conditions affecting low- and middle-income countries (LMICs). A core aspect of my work is implementing these methods in **R open-source software**, striving to make advanced statistical methodology more transparent and accessible to researchers and practitioners globally.

I am deeply committed to **capacity building** in LMICs, designing and leading training programs, workshops, and mentoring initiatives in partnership with international organizations and academic institutions, whilst working closely with Ministries of Health and key stakeholders to support evidence-based decision-making across low and middle income countries.

At the heart of my work is a strong commitment to improving the **well-being of people worldwide**. I am driven by the belief that statisticians have a vital role in bridging the gap between advanced methods and practical decision-making, ensuring the development of evidence-based health policies and the efficient use of limited resources.

EDUCATION

- **Ph.D. in Statistics and Epidemiology**, Lancaster University, UK (September 2015)
- **MSc in Statistics**, Università degli Studi di Padova, Italy (July 2012)
  Achieved 110/110 cum laude
- **BSc in Statistics**, Università degli Studi di Padova, Italy (April 2010)
  Achieved 110/110 cum laude
- Award in Leadership and Management (Level 5), Lancaster University, UK (August 2019)
- Postgraduate Certificate in Academic Practice, Lancaster University, UK (November 2018)

ACADEMIC APPOINTMENTS

- **Professor in Statistical Science** (125th Anniversary Chair), University of Birmingham (October 2025 – present).
- **Honorary Professor**, Faculty of Health and Medicine, Lancaster University (October 2025 – present).
- Visiting Associate Professor, School of Tropical Medicine and Global Health, Nagasaki University, Japan (March 2023–April 2025)
- **Associate Professor in Biostatistics**, Lancaster University, UK (1 August 2020 – September 2025)
- **Assistant Professor in Biostatistics**, Lancaster University, UK (1 July 2018 – 31 July 2020)
- Medical Research Council Fellow in Biostatistics, Lancaster University UK (1 July 2015 – 30 June 2018).

LANGUAGES

- English: proficient (C2)
- Italian: native
- Japanese: After self-teaching Japanese for 4 years, I have taken and successfully passed the Japanese Language Proficiency Test N2 exam (B2, upper intermediate/advanced), administered by the University of Edinburgh in December 2024.

AWARDS AND FELLOWSHIPS

- **Dean's Award 2024** (Student nomination award) from the Faculty of Health and Medicine. Award given "in recognition of strong commitment to training individuals from underrepresented backgrounds and passion to train the next generation of statisticians and epidemiologists from countries where there is a need for such expertise."
- Winning proposal for the **Mardia Interdisciplinary Workshop Prize 2024** awarded by the Royal Statistical Society. The funds received from this prize have supported the delivery of workshops focused on the application of geostatistical methods to inform policy decisions on the control and elimination of neglected tropical diseases.
- **Lancaster University Research Impact Awards Highly Commended.** Award given in recognition of the impact generated by the impact case study selected by the Faculty of Health and Medicine at Lancaster University for the Research Excellence Framework 2021 (www.ref.ac.uk).
- **Invitational fellowship awarded by the Japanese Society for the Promotion of Science** for a research visit of 1 month (June 2022) at the School of Tropical Medicine in Nagasaki University to start a new collaboration with Prof Minakawa Noboru and his team.
- **Royal Statistical Society Research Prize** (September 2018): Award given for outstanding published contribution at the interface of statistics and epidemiology, spanning the development of spatial statistical methods, their application to a range of substantive problems in global population health research and their implementation in open-source software.
- **N8 New Pioneers** (www.n8research.org.uk/n8-new-pioneers): winning nomination across the N8 Research Partnership Universities for "significant contributions to the development of statistical methodology and its applications to public health problems in developing countries".
- **IPUMS International Research Award** (March 2019): Award given in recognition of outstanding work, published in the paper by Macharia, Giorgi, Thuranira et al. (2019), using Integrated Public Use Microdata Series data.
- **Strategic Skills Development Fellowship in Biostatistics**, Medical Research Council, (June 2015 – July 2018).
- **Young Investigator Award, First-tier mention** (November 2014): Award given for the work presented at American Society of Tropical Medicine and Hygiene 2014 Conference in New Orleans, USA.
- **Young Statistician's Showcase Prize** (July 2014): Best postgraduate student paper among European applicants, selected from more than 30 entries submitted for the International Biometric Conference held in Florence, Italy, in July 2014.
- Economic and Social Research Council, Quantitative Methods Pathway PhD Studentship (October 2012)

LEADERSHIP AND ENGAGEMENT

- **Head of the World Health Organization Collaborating Centre** on Geostatistical Methods for Neglected Tropical Diseases (2022–2026). I led the development and application of innovative geostatistical methods to support the control and elimination of neglected tropical diseases (NTDs). I worked closely with Ministries of Health to inform policy decisions through evidence-based analyses and provided technical assistance for the design of cross-sectional surveys using geostatistical methods. I established collaborative partnerships with countries including Ethiopia, Nigeria, Malawi, Tanzania, Chad, Brazil, French Guiana, and Burkina Faso; these collaborative links and applied research programmes continue through ongoing collaborations and knowledge exchange initiatives.

- **Head of the Centre for Health Informatics, Computing and Statistics** (July 2021 – June 2025). I have led a multidisciplinary group of approximately nine academics, providing strategic leadership in both research and teaching to advance health data science. My role has involved steering the group's efforts in key domains, including the development of geospatial methods for public health, infectious disease modeling, and the analysis of routinely collected health data.

- Member of the **National Institute for Health Research Global Advanced Fellowships** (NIHR-GAF) funding committee (August 2026–present). NIHR-GAF supports postdoctoral global health researchers pursuing research leadership through applied research projects in strategic global health areas. I contribute expertise in biostatistics to the evaluation of applications, and participate in all stages of the funding cycle including review, shortlisting, and candidate interviews.

- Member of the **UK Research Innovation Talent Panel College** (January 2023 – present): Acted as a panel decision member for funding calls, including International Collaboration Grants (May 2023, EPSRC-funded).

- Member of the **Springboard Selection Panel, Academy of Medical Sciences** (October 2025–present): Panel responsible for reviewing applications that support newly independent researchers in the biomedical and life sciences. I contribute expertise in biostatistics and global health research to inform assessment and decision-making. As part of this role, I also contributed to revising the statistical guidance for applicants.

- Completed the **Bonnington Leadership Programme** at Lancaster University, designed for senior staff (Grade 8 or above) with significant management and leadership responsibilities.

- Served as a **grant reviewer** for various funding bodies, including:
  - Medical Research Council Methodology funding scheme;
  - UKRI Future Leaders Fellowships;
  - Discovery Grants, Natural Sciences and Engineering Research Council of Canada;
  - Research Ireland Frontiers for the Future Awards Programme.

- External **reviewer for academic promotion** cases:
  - Principal Enterprise Fellow (Level 5), Faculty of Environmental and Life Sciences, University of Southampton (November 2021)
  - Associate Professor of Health Data Science, Princess Sumaya University for Technology, Jordan (February 2026)
  - Professor of Statistics, Department of Mathematical Sciences, University of Bath (April 2026)
  - Associate Professor (Profesor Asociado), Department of Statistics, Faculty of Mathematics, Pontificia Universidad Católica de Chile (August 2026)

- External Expert Reviewer for the DSTrain MSCA Cofund Project (Panel 5L: "The Social Side of Data") at the University of Oslo, evaluating fellowship applications and contributing to consensus scoring for candidate selection.

- Consulted by:
  - **The Academy of Medical Sciences** (via Dr Clare McVicker) to contribute to their 2022–2032 Strategy, shaping initiatives to promote global health through evidence-based research.
  - **The Bill & Melinda Gates Foundation** to advise on the integration of geospatial methods into their research strategy for Neglected Tropical Diseases (NTDs), influencing current funding frameworks.
- **Director of Studies** for:
  - "Master of Research in Quantitative and Translational Skills in Global Health" (2020–2022).
  - "Master of Science in Health Data Science" (2021–2025).

  I spearheaded the development of the MSc in Health Data Science, designing its structure, convening modules, and fostering interdisciplinary collaboration across Mathematics, Statistics, Health Research, and Computing Science. As Director of Studies, I secured scholarships to increase accessibility, including 30 funded by the Office for Students (2023–25) and 5 by AstraZeneca (2024–25). I also established partnerships with external agencies, enhancing the programme's reputation, and creating internship and placement opportunities for students. My efforts earned recognition from AstraZeneca, resulting in sponsored scholarships and further opportunities for student engagement.
- **Academic Adviser for the Commonwealth Scholarship Commission** (December 2019 – present): Expert reviewer for Master and PhD scholarship applications from Commonwealth countries.
- **Advisory Committee Member for the Wellcome Trust Open Research Fund** (September 2019): Provide expertise in geospatial statistics, assessing grant applications at panel meetings.
- **Royal Statistical Society Coordinator for the AIMS Partnership** (January 2018 – January 2022): Led the collaboration with the African Institute for Mathematical Sciences (AIMS) in Limbe (Cameroon) to recruit lecturers, tutors, and design the statistics curriculum for the Master of Applied Mathematics.
- **Member of the College of Experts, African Research Excellence Fund (AREF)** (June 2016 – present): Panel member and reviewer for fellowship applications supporting African researchers.
- **Committee Member of the British and Irish Region, International Biometric Society** (March 2017 – December 2019): Organised scientific events promoting collaboration between statisticians and scientists in various disciplines.

PUBLICATIONS

Overall summary statistics: 3 books; 107 published peer-reviewed articles; 3 invited book chapters; 13 articles under review. Total number of citations by year: 333 (2020); 473 (2021); 482 (2022); 612 (2023); 536 (2024); 686 (2025). H-index: 32

EDITORIAL ACTIVITY

- Associate Editor for the **Journal of the Royal Statistical Society, Series A** (Jan 2025 – Dec 2029).
- Member of the Editorial Team for **BMC Global and Public Health** (March 2025–present, **PLoS ONE** (2022–2025), **PLoS Neglected Tropical Diseases** (2026–present). For the first of these three journals, I have also developed and co-edited the Special Issue entitled *"Advanced Data-Driven Analytical Frameworks to Support and Improve Policy Decisions"* (link: `link.springer.com/collections/gihbcefeah`).
- Editorial Board member for **Spatial Statistics** (IF: 2.06) and **PeerJ** (IF: 2.98), overseeing peer review for research in spatial epidemiology. Responsibilities include assessing submissions, selecting reviewers, evaluating feedback, and making editorial decisions, handling 1–2 manuscripts per month.
- Member of the **Statistical Reviewers (SR) group for JAMA Open Network** (IF: 5.032), reviewing at least one manuscript per month with a focus on statistical rigour. The SR is a group of internationally selected statisticians committed to reviewing at least one paper per month for the journal, focusing on the statistical aspects of submitted manuscripts.
- Guest Editor for the special issue *Current Research on Serological Analyses of Infectious Diseases*[2] in **Frontiers in Medicine** (IF: 3.9).
- Frequently invited to carry out **peer review** of manuscripts submitted to high-impact journals, including *Nature*, *Nature Communications*, *Proceedings of the National Academy of Sciences*, *eLife*, *The Lancet*, *Journal of the Royal Statistical Society*, and *Biometrics*.

CONFERENCES AND SEMINARS

- **Member of scientific committees** for the following conferences: Spatial Statistics 2017 (Lancaster University, September 2017, UK); 7th Channel Network Conference (Rothamsted Research, July 2019, UK); 29th International Environmetrics Society (TIES) Conference (Imperial College London, September 2020, UK); GEOMED2024 (Hasselt University, Belgium, September 2024).
- **Invited sessions at international conferences**

[2] `www.frontiersin.org/research-topics/29838/current-research-on-serological-analyses-of-infectious-diseases`

1. "Spatial statistics for global health", Royal Statistical Society Annual Conference, September 2024, Brighton, UK.
2. "Spatial statistics for global health", GEOMED2024, September 2024, Hasselt, Belgium.
3. "Statistical methods for the analysis of electronic health records", Computational and Methodological Statistics, King's College London, December 2020.
4. "Using electronic health records for understanding spatial variation in disease risk", Royal Statistical Society 2019 International Conference, September 2019, Belfast, UK.
5. "Geostatistical methods for global health", GEOMED 2019, August 2019, Glasgow University, Glasgow, UK.
6. "Geo-spatial methods for global health applications", Royal Statistical Society 2018 International Conference, September 2018, Cardiff University, Cardiff, UK.

- **Keynote plenary talks at international conferences**

1. "11th International Conference on Spatio-Temporal Modelling – METMA", Lancaster University, Lancaster, UK.
2. "Conference on Health and Environmental Change: Modelling the association of environmental changes and health indicators", Leuven, Belgium, September 2023.
3. "Geostatistical modelling of spatially structured zero-inflation with applications to tropical disease mapping", Spatial Statistics 2019, Sitges, Spain, 10–13 July 2019.

- **Invited talks at international conferences and workshops**

1. "A decay-adjusted spatio-temporal model to account for the impact of mass drug administration on neglected tropical disease prevalence", GEOMED 2026, University of Navarra, Pamplona, Spain, 18 June 2026.
2. Invited talk at "Workshop on Seropositivity Cutoff Determination for Commercial Multiplex Immunoassay Kits for Integrated Infectious Diseases Serosurveillance", The Task Force for Global Health, Atlanta, Decatur, USA, 23 April 2026.
3. "Capacity building for geostatistics" in *Model-Based Geostatistics for Preventive Chemotherapy-NTD Programs: Understanding Today, Shaping Tomorrow.* AI and Digital Health in NTD Management, Neglected Tropical Disease NGO Network (NNN) Conference 2025, Kampala, Uganda, 1 October 2025.
4. "Relating Schistosoma haematobium exposure to female genital schistosomiasis using a model-based approach". Map-FGS workshop, Dakar, Senegal, 8–9 September 2025.
5. "A parameter-driven spatio-temporal model for modelling areal-level data". Workshop on spatio-temporal modelling, Oslo University, Oslo, Norway, 17–19 March 2025.
6. "Assessing the impact of spatial covariates in the use of model-based geostatistical models for trachoma prevalence surveys", WHO Trachoma Scientific Meeting, Hammamet, Tunisia, May 14, 2024.
7. "Using model-based geostatistics to inform trachoma elimination", The Twenty-Fifth Annual Trachoma Control Program Review, The Carter Center, Atlanta, USA, April 2024.
8. "International Workshop of Statistical Modelling", Durham University, Durham, UK, July 2024.
9. Carter Center Annual Meeting 2024, Emory University, Atlanta, April 2024.
10. "64th World Statistics Congress", Ottawa, Canada, July 2023.
11. GRASPA-TIES European 2021 Workshop, Rome, Italy, 7–9 June 2021.
12. Climate Change and Infectious Diseases Spatio-Temporal Statistical Modelling and Implementation Research, School of Public Health and Community Medicine, Institute of Medicine, Sahlgrenska Academy, University of Gothenburg, Sweden, 14–16 April 2021.
13. Annual Meeting of the Coalition for Operational Research on Neglected Tropical Diseases, November 12–14 2020. (Virtual conference originally scheduled to take place in Toronto, Canada.)

14. 12th International Conference on Methodological and Computational Statistics, Senate House, University of London, 14–16 December 2019.
15. 3rd International EcoStat Conference, June 2019, National Ching Hsing University, Taiwan.
16. Royal Statistical Society, 2018 International Conference, September 2018, Cardiff University, Cardiff, UK.
17. 10th International Conference on Teaching Statistics, Kyoto, Japan. July 2018.
18. "Geospatial Child Health and Epidemiology Workshop", Sheffield Hallam University, Sheffield, UK, June 2018.
19. International Workshop on "Geospatial methods for closing the global mortality data divide", Centre for Global Health Research, Toronto, Canada. June 2018.
20. Workshop on "Model-based geostatistics: methods and applications in low-resource settings", Kenya Medical Research Institute, Nairobi, February 2018.
21. Spatial Statistics Conference, July 2017, Lancaster University, Lancaster, UK.
22. Royal Statistical Society, 2017 International Conference, September 2017, Strathclyde University, Glasgow, UK.
23. Royal Statistical Society 2016 International Conference, September 2016, University of Manchester, Manchester, UK.
24. International Workshop on Spatio-Temporal Statistics, April 2016, Imperial College London, London, UK.
25. International Biometric Conference, July 2014, Florence, Italy.
26. Workshop on Non-Gaussian Multivariate Statistical Models and their Applications, May 2013, Banff International Research Station, Banff, Canada.
27. 7th CSDA International Conference on Computational and Financial Econometrics, December 2013, Senate House, University of London, London, UK.

- **Invited talks at external seminars**

1. Seminar "Latent variable models for the analysis of antibody density data: from non-spatial univariate to spatial multivariate", Institute Pasteur, Paris, France, September 2026.
2. Seminar on "A flexible class of latent variable models for the analysis of antibody response data", Royal Statistical Society West Midlands Local Group, University of Birmingham, Birmingham, UK, March 2026.
3. Seminar on "A decay-adjusted spatio-temporal model to account for the impact of mass drug administration on neglected tropical disease prevalence", Department of Statistics, University of Washington, Seattle, United States, March 2026.
4. Seminar on "A flexible class of latent variable models for the analysis of antibody response data", Barcelona Supercomputing Centre, Barcelona, Spain, December 2025.
5. Seminar on "A decay-adjusted spatio-temporal model to account for the impact of mass drug administration on neglected tropical disease prevalence", Department of Statistics, University of Lund, Lund, Sweden, April 2025.
6. Seminar on "Model-based Geostatistics for Global Public Health: From Methodology Development to Policy Applications", Oslo Centre for Epidemiology and Biostatistics, Oslo University, Oslo, Norway, March 2025.
7. Seminar on "Combining school-catchment area models with geostatistical models for analysing school survey data from low-resource settings: inferential benefits and limitations", Department of Geography and Environmental Science, University of Southampton, April 2022.
8. Seminar on "Combining school-catchment area models with geostatistical models for analysing school survey data from low-resource settings: inferential benefits and limitations", Department of Statistics, University of Toronto, April 2022.

9. Seminar on "Geostatistical analysis of school malaria data with missing locations", University of Waterloo, Waterloo, Canada, 25 November 2021.
10. Seminar on "Introduction to spatial statistics and modelling ideas on historical data on causes of death in Amsterdam", Radboud University, The Netherlands, 12 June 2020.
11. Seminar on "Geostatistical methods for combining multiple indices of animal abundance", University of Sussex, December 2019.
12. Seminar on "A geostatistical framework for combining spatially referenced disease prevalence data from multiple diagnostics". 7 December 2018, Padua, Italy.
13. Seminar on "A geostatistical framework for combining spatially referenced disease prevalence data from multiple diagnostics". 27 November 2018, Turin, Italy.
14. Seminar on "Disease mapping and visualization using spatio-temporally referenced prevalence data". May 2017, Strathclyde University, Glasgow, UK.
15. Seminar on "Geostatistical methods for prevalence mapping", University of Colorado, Denver, USA, February 2017.
16. Seminar on "Malaria, river-blindness and plague: three case-studies in spatial modelling of tropical diseases". April 2015, London School of Hygiene and Tropical Medicine, London, UK.

16 – 18. Seminars on "Combining data from multiple spatially referenced surveys using generalized linear geostatistical models", at: Heriot-Watt University, Edinburgh, UK (October 2013); University of Leeds, Leeds, UK (November 2013); University of Warwick, Coventry, UK (June 2014).

- **Contributed talks at international conferences**

1. American Society of Tropical Medicine and Hygiene, November 2014, New Orleans, USA.
2. GEOMED2013, September 2013, The University of Sheffield, Sheffield, UK.

FUNDING

In total, I have been awarded approximately **$4,112,876** through grants and consultancy projects. This includes:

- **Grants as Principal Investigator (PI):** $3,061,965
- **Grants as Co-Investigator (CI):** $926,479
- **Consultancies:** $124,432

Below I provide more details for each of the above.

- **Successful grant applications**

1. **PI:** Geostatistical methods for soil-transmitted helminths control. EvidenceAction, November 2025 – October 2026. $70,739.64.
2. **PI:** Geostatistics for Global Health (Grant No. 1007084), 2025–2030, Bill & Melinda Gates Foundation, November 2025 – March 2030, $1,688,866.
3. **PI:** Geostatistical methods for neglected tropical diseases, TaskForce for Global Health, October 2024 – September 2025, $83,071.
4. **PI:** Assessing the impacts of declining vaccination rates on the occurrence of measles in the UK using epidemic models, NIHR, 2024–2026, $103,670.50.

5. **PI:** Model-based geostatistics for persistent and recrudescent trachoma, 2023–2024, USAID, $149,187.
6. **PI:** Approximating optimal survey designs in low prevalence environments, 2023–2024, Evidence-Action, $90,071.
7. **PI:** Spatio-temporal geostatistical methods for malaria mapping in North-East Uganda, 2023–2024, Pilgrim Africa, $15,274 (Phase II).
8. **PI:** "Spatio-temporal modelling of soil-transmitted helminth infections", National Institute of Health Research, $98,217, October 2022 – September 2024.
9. **CI:** "Identification of best practices for biodiversity recovery and public health interventions to prevent future epidemics and pandemics", European Commission HORIZON2020, $371,233, September 2022 – December 2026.
10. **PI:** "Model-based geostatistics for global public health", $4,015, Butterfly Awards, Sasakawa Foundation, September 2022.
11. **CI:** "Predicting STH prevalence with minimal re-mapping", Task-Force for Global Health, $126,395, October 2021 – March 2023.
12. **CI:** "Diagnostic algorithms for tuberculosis", Medical Research Council, $31,543, October 2021 – March 2023.
13. **PI:** "Spatio-temporal modelling of leptospirosis infections in slum settlements in Salvador, Brazil", National Institute of Health Research, $97,304, October 2021 – September 2023.
14. **PI:** "Optimizing NTD diagnostics and sampling strategies for low-prevalence settings", TaskForce for Global Health, September 2021 – August 2022, $109,326.
15. **PI:** "Geostatistical analysis and design of STH and trachoma prevalence surveys", World Health Organization, April 2021 – December 2022. $55,000.
16. **CI:** "Geostatistical inference using spatially misaligned and aggregated data: a novel framework for disease mapping in low-resource settings", Royal Society Interface Newton International Fellowship, March 2021 – March 2024, $103,106.
17. **PI:** Spatio-temporal geostatistical methods for malaria mapping in North-East Uganda, 2020–2022, Pilgrim Africa, $66,678.
18. **CI:** Mosquito-Borne Disease Prevention in Africa Network (MosquitoNET), 2019, EPSRC, $3,390.
19. **PI:** "A capacity-building platform for advancing biostatistics in Ethiopia, Kenya and Malawi", April 2020 – April 2021, Engineering and Physical Sciences Research Council, $147,885.
20. **CI:** "Predictive Personalized Public Health (P3H): A Novel Paradigm to Treat Infectious Disease", National Institutes of Health, $96,099 ($71,344), September 2019 – September 2021.
21. **PI:** "Spatio-temporal variation of malaria transmission in Africa: modelling, capacity-building and translating research into practice", Academy of Medical Sciences, $57,826, 2019–2021.
22. **CI:** "Loa loa geospatial and post-validation surveillance modelling", The Taskforce for Global Health, $142,871, 2019–2023.
23. **CI:** "NTD Modelling Consortium: moving towards elimination", Bill and Melinda Gates Foundation, $447,364, 2017–2021.
24. **PI:** "Geostatistical methods for disease risk mapping", Medical Research Council Strategic Skills Fellowship in Biostatistics, $256,631 (MR/M015297/1), 2015–2018.

- **Consultancy**

1. "Assessing the elimination of trachoma in Mozambique and Kenya", Sightsavers, $7,064.
2. "Geostatistical modelling of lymphatic filariasis in Belitung, Indonesia", Washington University (United States), $10,000.
3. "Geostatistical analysis and survey design for LF control in Papua New Guinea", Case Western Reserve University (United States), $10,000.

4. "Geo-statistical support and training in the analysis of trachoma data", Sightsavers, $12,942, March – July 2022.
5. "Development and implementation of early warning system for malaria in Mozambique", November 2019 – April 2021, Clinton Health Access Initiative, $15,000.
6. "Geostatistical design of soil-transmitted helminth surveys", Evidence in Action, 2020, $7,425.
7. "Development of an early warning system for dengue in South-East Asia", HR Wallingford, 2019–2021. (Private consultancy for mentoring and training of research staff.)
8. "Development of mathematical algorithms and software models for the KoalaBASE dataset", 2018, University of Queensland, $4,500.
9. "Technical support to provide malaria risk maps (continuous and by administrative areas) for Tanzania and Mali", 2018, Department for International Development UK, $10,000.
10. "Case-control study on household air pollution and pneumonia in Malawian adults", 2017, Liverpool School of Tropical Medicine, $2,000.

TEACHING

- **Summer school on infectious disease epidemiology**: As Head of the WHO Collaborating Centre (WHO-CC) in Lancaster, I established formal partnerships with WHO-CCs in Zanzibar (Tanzania) and Naples (Italy) to create a summer school on the epidemiology of infectious diseases. Delivered as a taught MSc module (15 credits) in July 2024 on Pemba Island, the programme has been successfully integrated into the MSc and PhD in Health Data Science curricula at Lancaster University.
- **MSc courses**
  1. **Model-based Geostatistics for Global Health** at Oxford University. Appointed as an external lecturer to develop and deliver the course *"Model-based Geostatistics for Global Health"* for the MSc in Modelling for Global Health.
     - Approx. 20 students, 15 hours of teaching contact.
     - Delivered in March 2023 and March 2024.
  2. **Model-based Geostatistics for Global Health** at Cambridge University. Appointed as an external lecturer to develop and deliver the course *"Model-based Geostatistics for Global Health"* for the MPhil in Population Health.
     - Approx. 15 students, 25 hours of teaching contact.
     - Delivered in April 2022 (2021–22 academic year), March 2023 (2022–23 academic year), April 2024 (2023–24 academic year), April 2025 (2024–25 academic year) and April 2026 (2025–26 academic year).
     - Planned delivery for April 2025 (2024–25 academic year).
  3. **Geostatistical Modelling** at Lancaster University. I have designed and delivered a two-week course (20 hours, including lectures and lab sessions) for the Master of Research in Global Health.
     - Approx. 10 students.
     - 20 hours teaching (15 credits).
     - Delivered annually from 2017–18 through 2024–25.
  4. **Model-based Geostatistics for Public Health** at Lancaster University. I have designed and delivered a two-week course (20 hours, including lectures and lab sessions) for the MSc in Health Data Science.
     - Delivered in the 2021–22 academic year.
  5. **Time-Series Analysis in Epidemiology** at Lancaster University. I have designed and delivered a two-week course (20 hours, including lectures and lab sessions) for the MSc in Health Data Science.
     - Approx. 10 students.

  - 20 hours teaching (15 credits).
  - Delivered annually in the academic years 2021–22, 2022–23, 2023–24 and 2024–25.

- **Medicine and Surgery (MBChB)** programme at the Lancaster Medical School.

  I have designed and supervised Special Study Modules (SSMs) in Health Data Science for medical students. These modules aim to develop analytical skills and foster interest in the application of statistical methods in the medical profession.

  - I directly supervised a total of six students.
  - I facilitated the involvement of other group members from CHICAS in supervising additional students.

- **Continuing Professional Development courses**

  1. **Introduction to Model-based Geostatistics for Global Public Health,** Online Workshop, 20–21 April 2021. Teaching material and description of the event available at `mbgworkshop2021.netlify.app/`
  2. **Workshop on Geostatistical Methods for Disease Mapping**, Lancaster University, 3–5 June 2019. I designed, organised and delivered a three-day training workshop which brought together 28 early-career researchers working on disease mapping.

- **Invited lectures and courses**

  1. **Invited course: "Introduction to Model-Based Geostatistics for Public Health"**, Italian Society of Parasitology, Department of Veterinary Medicine and Animal Production, University of Naples Federico II, Naples, Italy, 14–16 September 2026. Three-day course delivered to 10 participants, comprising veterinary PhD students and researchers ranging from assistant to associate professor level.
  2. **Model-based Geostatistics for Global Public Health: From Methodology Development to Policy Applications:** invited lecture for the Data for Action course at the Institute of Tropical Medicine, Antwerp (Belgium), 12 March 2026.
  3. **Invited course "Model-based geostatistics for global public health using R"** at the Royal Statistical Society Conference, Edinburgh, UK, 1 September 2025.
  4. **Invited course on "Geospatial methods for public health and veterinary scientists"** attended by 15 researchers across Australia and Hong Kong, Toowoomba, University of Queensland, 22–25 November 2019.
  5. **Introduction to model-based geostatistics for public health applications:** an invited lecture for research staff based at Servizio Sanitario Italiano and the Environmental Protection Agency of the Piedmont Region at the Unit of Cancer Epidemiology in Turin, Italy, 27 November 2018.
  6. **Lectures on Monte Carlo maximum likelihood:** a two-day workshop for MSc and PhD students in the Department of Statistics at the University of Hasselt, Belgium, 25–26 October 2018.
  7. **Geospatial methods for public health**: invited courses for the European Programme in Epidemiological Education (`www.eepe.org/courses`) delivered in Florence, Italy, in the following years: 11–12 June 2018; 8–11 July 2019; 4–7 July 2022.
  8. **Invited lecture on geostatistics** for the Doctoral Programme in Statistics, University of Florence, Italy, March 2018.
  9. **Geostatistical methods for public health scientists**: Invited short course for one week in October 2015 at the Malawi-Liverpool Wellcome Trust in Blantyre, Malawi.
  10. **Workshop on geostatistical methods for population health scientists**: Invited course at the International Society for Veterinary Epidemiology and Economics 2014 conference held in November 2015 in Merida, Mexico.

11. **Geospatial methods for public health applications**: I co-taught this course with Prof. Peter Diggle at the African Institute for Mathematical Sciences in Tanzania for the academic years 2015–16 and 2016–17.
12. **Introduction to Statistical Modelling**: Course delivered at the African Institute for Mathematical Sciences in Ghana for the academic year 2016–17.

LINE MANAGEMENT, SUPERVISION, MENTORING AND EXAMINER ROLES

- **Line management of academic staff (University of Birmingham)**

1. Dr Claudio Fronterre, Senior Research Fellow, October 2025 – Present.

- **Line management of academic staff (Lancaster University)**

1. Dr Gemma Chaters, Lecturer (Assistant Professor), April 2024 – September 2025.
2. Dr Jonathan Read, Senior Lecturer (Associate Professor), August 2021 – September 2025.
3. Dr Claudio Fronterre, Lecturer (Assistant Professor), August 2021 – September 2025.
4. Barry Rowlingson, Senior Research Assistant, August 2021 – September 2025.
5. Dr Sam Moore, Lecturer (Assistant Professor), April 2023 – September 2025.
6. Dr Rhiannon Edge, Lecturer (Assistant Professor), August 2021 – April 2023.

- **Primary supervision and line management of Research Associates**

1. Freya Clark, October 2021 – Present.
2. Jana Ranchovska, October 2022 – September 2024.
3. Dr Dileepa Ediriweera, September 2022 – November 2024.
4. Tom Nicholls, April 2023 – February 2025.
5. Dr Matthew Timperley, April 2023 – Present.
6. Misaki Sasanami, August 2022 – November 2024.
7. Dr Amita Puranik, March 2022 – June 2023.
8. Dr Lucinda Hadley, February 2022 – February 2025.
9. Dr Max Eyre, May 2022 – December 2022.
10. Jack Woodmansey, January 2020 – June 2020.
11. Dr Benjamin Amoah, October 2018 – August 2021.
12. Dr Claudio Fronterré, March 2019 – June 2021.
13. Dr Olatunji Johnson, October 2019 – August 2021.

- **Lancaster Medical School PhD students**

1. Richard Kamwezi, Main Supervisor, 2022 – Present.
2. Nirali Soni, Main Supervisor, 2022–2025.
3. Pablo Ruiz Cueva, Main Supervisor, 2022–2025.
4. Rachel Mountain, Secondary Supervisor, 2020–2024.
5. Jessie Khaki, Main Supervisor, 2020–2025.
6. Max Eyre, Main Supervisor, 2018–2021.
7. Benjamin Amoah, Main Supervisor, 2015–2018.
8. Olatunji Johnson, Main Supervisor, 2017–2019.
9. Irene Kyomuhangi, Main Supervisor, 2017–2021.

10. Beate Ringwald, Secondary Supervisor, 2018–2022.
11. Maddy French, Secondary Supervisor, 2018–2021.

- I serve as a mentor in the University of Birmingham **NEST programme**, providing mentorship to early-career academics. My mentees have been: Apenteng, P. (Research Fellow).

- **Mentorship of academics from external organisations**

  1. Dr Abdulhakeem Olarewaju Sulyman (Recipient of the AREF Research Development Fellowship, 2024), Lecturer in the Department of Biochemistry, Kwara State University (KWASU), Malete, Nigeria.

- **Supervision of Visiting PhD students**

  The students below have registered as Visiting PhD Research students at to work under my supervision.

  – *University of Birmingham (2026-present)*
    1. Allegra Sartore, Faculty of Medicine, University of Padua, Italy, Jnanuary 2026 – July 2026.
    2. Juliet Santana, Federal University of Bahia, Salvador, Brazil, December 2025 – April 2026.
  – *Lancaster University (2019-2025)*
    1. Victoria Dedavid Ferreira, Federal University of Bahia, Brazil, November 2024 – April 2025.
    2. Patrick K. Kalonde, Liverpool School of Tropical Medicine, April–May 2024.
    3. Rachele Vada, University of Turin, April–May 2024.
    4. Giorgia Stoppa, University of Padua, April–May 2023.
    5. Alejandro Poza, Hasselt University: April–June 2023; May–June 2024.
    6. Giovenale Moirano, University of Turin, March–April 2019.
    7. Mohammad Moinudding, University of Padua, May–July 2019.
    8. Berta Pujol, The Barcelona Institute for Global Health (ISGlobal), April–June 2019.

- **Supervision of Lancaster Medical School Visiting Master students**

  1. Agnes Nguku, Hasselt University, May–June 2019 (ERASMUS Programme).

- **Supervision of External PhD students**

  1. Bedilu Alamirie, Addis Ababa University (Ethiopia), Secondary Supervisor, 2018–2021.
  2. Yonas Shuke Kitawa, Hawassa University (Ethiopia), Secondary Supervisor, 2018–2022.
  3. Rebecca Nightingale, Liverpool School of Tropical Medicine, Co-Supervisor, 2016–2020.

- **Supervision of University of Birmingham Master students**

  Ranveer Basra (2025–26), MSc in Bioinformatics; Mekha Justin (2025–26), MSc in Bioinformatics.

- **Supervision of Lancaster University Master students**

  – Master of Research in Global Health: 2019/20 Anna Trett; 2017/18 Max Eyre, Joshua Longbottom, Remy Hoek Spaans, Melodie Samarro, Wanjiku Kagima.
  – MSc in Data Science: Luis Bardon-Barnett (2019/20).
  – MSc in Statistics: Freya Clarke (2021–22).
  – MSc in Health Data Science: Mahi Chowdhury (2021–22), Catherine Ojo (2021–22), Jana Ranchovska (2022–23), Prika Huang (2022–23).

- **Personal Academic Tutor, MSc Public Health, University of Birmingham.** I provide academic and pastoral support, including induction, progress monitoring, and signposting to wellbeing and careers services, to postgraduate students:

  - 2026/27: Abbie Meacham, Gurleen Kaur, Samiya Mohammed Ayyub Khan, and Sonu Sadanandan.

- **External Master students**

  1. Guy Tsafack (African Institute for Mathematical Sciences – Cameroon), 2019.
  2. Grace Ndukukyule (African Institute for Mathematical Sciences – Ghana), 2016.
  3. Susan Nabusamba (African Institute for Mathematical Sciences – Ghana), 2016.
  4. Mawazo Mtafya (African Institute for Mathematical Sciences – Tanzania), 2016.
  5. Olatunji Johnson (African Institute for Mathematical Sciences – Tanzania), 2015.
  6. Edwin Moyo (African Institute for Mathematical Sciences – Tanzania), 2015.

- Appointed mentor by the African Research Excellence Fund for Dr Abdulhakeem O. Sulyman (University of Ilorin, Nigeria), January–September 2025.

- I have acted as an **External PhD examiner** for the following theses:

  1. "Mathematical Modelling of Multiplex Multi-pathogen Serological Data", Gaelle Baudemont, Unité Epidémiologie et Analyse des Maladies Infectieuses, Institut Pasteur, Paris, France, September 2026.
  2. "Modelling Spatio-Temporal Cluster Point Processes: A Comprehensive Study of Hawkes Models and Their Applications", Alba Bernabeu Atanasio, Universitat Jaume I, Castelló, Spain, January 2026.
  3. "Efficient Spatial and Temporal Learning with Sparse Spectral Gaussian Processes", Jeremy Sellier, University College London, February 2024.
  4. "Statistical Modelling with Additive Gaussian Process Priors", Sahoko Ishida, London School of Economics, London, UK, November 2023.
  5. "A Statistical Framework to Adapt Traditional Spatial and Temporal Methods to Non-standard Specialized Large Databases", Oana Petrof, Hasselt University, Belgium, November 2022.
  6. "Statistical Computing with Graphics Processing Units", Ruoyong Xu, University of Toronto, Canada, December 2022.
  7. "Modelling the Spatio-temporal Heterogeneity of Malaria in Sub-Saharan Africa", Polycarp Kambona Mogeni, The Open University, UK, September 2017.

- **Internal examiner:** Poppy Miller (PhD in Statistics and Epidemiology), Lisa Koeppel (PhD in Statistics and Epidemiology), Alison Hale (MSc in Statistics), Jude Kum (MSc in Data Science), Thomas Ian Lidgard (MSc in Statistics).

OTHER ENGAGEMENT AND OUTREACH ACTIVITIES

- **Organiser of the WHO Collaborating Centre Technical Meeting on Capacity Building of Geostatistical Expertise in Low- and Middle-Income Countries** (Lancaster University, 3–4 March 2025): Organised a technical meeting that convened 34 participants to discuss the development of an action plan for establishing a capacity-building network in Africa, South America and South-East Asia. The event was sponsored by the Royal Statistical Society through a Mardia Prize (see "AWARDS AND FELLOWSHIPS" section above).

- **Organiser of the WHO Collaborating Centre Technical Meeting on Geostatistical Methods for Trachoma Elimination** (Lancaster University, 5–6 March 2024): Organised a technical meeting that convened 38 participants, including statisticians, epidemiologists, stakeholders, and policymakers from low- and middle-income countries, to discuss the application of geostatistical methods to inform trachoma elimination strategies.

- **Organiser of the International Workshop on Disease Mapping in Low-resource Settings** (Lancaster University, 14–15 September 2017): Hosted a two-day workshop bringing together internationally leading experts in spatial epidemiology and statistics to address public health challenges in Sub-Saharan Africa.

- **Engagement with the Lancaster Medical School assessment team**: Initiated two impactful projects to enhance the assessment and selection processes at the medical school:

  – Developed a user-friendly application to standardise scores from the Multiple Mini Interviews (MMIs) for the MBChB programme. This innovation, implemented in 2023–24, improved fairness and efficiency in the selection process. The project was presented at the European Board of Medical Assessors Annual Conference (April 2024) and has been published on the *Journal of Medical Education and Curricular Development* (see "*Teaching of statistics*" under the Publications section).

  – Supervised the development of a Microsoft Access database to monitor the participation and training completion of Observed Structured Clinical Examination (OSCE) examiners, enhancing data management and reporting capabilities.

- Actively engaged in **public outreach and diversity initiatives**, including:

  – Hosting two Black interns as part of the Health Data Research UK Black Internship Programme (2024), focusing on disease mapping and vector distribution modelling.

  – Supervising an A-level student through the In2Stem initiative (October 2024), introducing them to health data science and neglected tropical diseases (NTDs), culminating in a poster presentation.

- Supported the establishment of cross-faculty initiatives, including the **Africa Research Hub** and the **Data Science Institute Geospatial Research Group**, by organising inaugural events and integrating perspectives from the Faculty of Health and Medicine.
